

## Multi-Hit

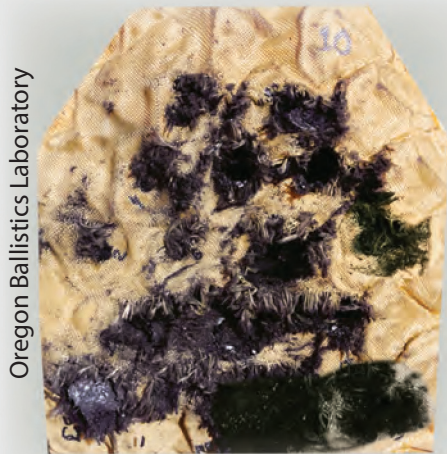

When a bullet impacts a hard ceramic, cracks extend radially from the point of impact.

With follow-on shots, these cracks reduce the ballistic efficacy of an armor plate. This can be most severe at the plate apex (circled).

With Verco's imbricated armor, only the impacted tile is damaged, the remaining are pristine.

## MotilityMH

Strike Face

Wear Face

Sixteen shots with M855A1. *No perforations.*  $3045.5_{\pm 12.8}$  ft/s, BFD:  $5.5_{\pm 1.4}$  mm.
